

PRODUCTS AND SERVICES

Antunes Controls (formerly Chicago Safety Products, Inc.) has been manufacturing AIR AND GAS PRESSURE SWITCHES for over thirty-five (35) years. Our pressure switches are very price competitive and our quality and reliability is excellent. We can cross-reference your current switches and provide you with a competitive quote and samples for testing.

Antunes Controls also manufactures TEMPERATURE CONTROLLERS AND DISPLAYS. We started the electronics division over fifteen (15) years ago and developed a complete line of controllers. There are several different models of temperature controllers ranging from a simple digital display to a 1/8 DIN unit .

Our temperature control line, the FREEZESTAT was developed specifically for the MAKE-UP AIR INDUSTRY. The Freezestat eliminates the use and installation of three (3) devices and incorporates a thermostat, timer, and relay into one (1) compact unit.

Our timer line, the SCT, was developed to meet O.E.M. applications where space and custom features are required. This microprocessor design enables us to change functions and packaging to meet your exact needs.

Another service offered is WIRE SETS AND HARNESSSES. We have a separate wire harness department that is responsible for doing all of the wire sets and harnesses. We have the automated equipment necessary to do small and large runs. We also ASSEMBLE AND WIRE SUB-PANELS per O.E.M. specifications. We are capable of doing large runs, however we also do runs as small as fifty (50) units.

In the last ten (10) years, we have offered our services as a BOARD HOUSE. We stuff, solder, calibrate, and test, controls per O.E.M. specifications. We have the automated equipment necessary to do large runs, however we also do runs as small as fifty (50) controls.

Most recently Antunes Controls has received its ISO 9001 certification. On October 18, 1996 we received ISO 9001 certification for our Quality System. We are committed to Quality and Service to our customers.

As you can see, Antunes Controls is very diversified. Our number one priority is to service our customers with quality and reliable products. We would like to hear from you today. Please call 630-784-1000 if you have any questions or require more information.

QUALITY - There's No Future Without It!
